NOTICE OF REQUEST TO AMMEND APPLICATION SPECIFICATION.

Dear Sir or Madam:

Thank you for receiving my application 10/776,195. I have recently sent corrected application papers to the Missing Parts section of the USPTO correcting the application document to have 1½ line spacing and due to the increase in the size of the document from that correction the following request to amend the application will correspond to the corrected version's page number arrangement. If you receive this prior to Missing Parts department receiving the corrected application paper please hold this request to the date that corrected application papers are available for your reference.

The specific request to amend the application specification is to add the following paragraph after the first paragraph of page 26 (copyright notice) and before the second paragraph (description of Figure 1), which is between lines 6 and 7 of page 26 of the corrected application 10/776,195. The following (in parenthesis) is the paragraph requested to be inserted:

“Specific embodiments of the invention will now be described in some further detail with reference to and as illustrated in the accompanying figures. These embodiments are illustrative, and not meant to be restrictive of the scope of the invention. Suggestions and description of other embodiments may be included but they may not be illustrated in the accompanying figures or alternatively features of the invention may be shown in the figures but not described in the specification.”

Thank you for receiving and reading my request.

Sincerely,

Neil Siewert
